- Appendix A: Pharmacy Benefit Managers Utilized by Large Group Health Plans..... 25
- Appendix B: Health Plan Names (Legal & Doing Business As) 27

I. Executive Summary

The California Department of Managed Health Care (DMHC) protects consumers' health care rights and ensures a stable health care delivery system. As part of this mission, the DMHC licenses and regulates health care service plans (health plans) under the Knox-Keene Health Care Service Plan Act of 1975. The DMHC regulates most commercial health plans and products in the large group, small group, and individual markets, including most of the health plans that participate in Covered California. The DMHC also regulates Medi-Cal managed care plans, Medicare Advantage plans, and specialized health plans, including dental and vision plans.

Senate Bill (SB) 546 (Leno, 2015), Health and Safety Code section 1385.045, requires health plans that offer commercial large group products to annually submit aggregate rate information and the weighted average rate increase for all large group benefit designs during the 12-month period ending January 1 of the following calendar year. Additionally, large group renewal notices delivered by health plans must include a statement comparing its proposed rate change to the average rate increases negotiated by the California Public Employees' Retirement System (CalPERS) and by Covered California. The DMHC is also required to conduct a public meeting regarding large group rate changes.

Health plans first submitted their large group aggregate rate information in October 2016. The DMHC held its first public meeting on large group aggregate rates in February 2017. Starting in 2022, the public meetings are held in even-numbered years only.

SB 17 (Hernandez, 2017), Health and Safety Code section 1367.243, requires health plans that file annual large group rate information with the DMHC to file specified information regarding health plan spending and year-over-year cost increases for covered prescription drugs. Since measurement year 2018, large group health plans have submitted prescription drug cost information as required by SB 17 in addition to aggregate rate information.

This report summarizes the large group aggregate rate information and analyzes the impact of the cost of prescription drugs on health plan premiums in the large group market for measurement year 2022, including comparisons over the course of the seven reported years. For measurement year 2022, 23 health plans submitted large group aggregate rate and prescription drug cost information.

Key Findings^{1,2}

Large Group Aggregate Rates

- In 2022, almost 7.9 million enrollees were in roughly 14,500 renewing groups in the large group market. The overall average premium per member per month (PMPM)³ was nearly \$552.
- Overall, the weighted average rate increase for the large group health plans was 4.1% in 2022.
- From 2016 to 2022, the average annual rate increases remained below 6%.
- A comparison of these average rate increases to those of Covered California and CalPERS shows that the annual average rate increases for the large group market ranged from 3.6% to 5.4%, compared to Covered California which ranged from 0.5% to 21.1% and CalPERS which ranged from 1.1% to 7.7%.
- About 74% of covered enrollees were in benefit plans that had an actuarial value⁴ of 90% or higher, which is the category with the richest benefits. Almost 93% of covered enrollees were in plans with an actuarial value of 80% or higher. Roughly 2% of enrollees in the large group market were in the leanest benefit range (i.e., less than 70%).
- While only 11.1% of groups were experience rated, the experience rated groups account for roughly 71% of total covered enrollees. In contrast, 88.9% of groups were either blended and community rated, accounting for approximately 29% of the total covered enrollees.

¹ The information in this report relies on the data submitted by the health plans.

² The analysis in this report does not include the information for the five In-Home Supportive Services (IHSS plans). The five IHSS plans had 69,820 enrollees as of December 31, 2022. The rate development process for IHSS plans differs from traditional large group health plans, which utilizes community rated, experience rated or blended rate development methodologies. For IHSS products, the county and the IHSS plans determine the rates which are based on the anticipated costs for providing services to the IHSS enrollees.

³ Per member per month, or PMPM, is a measure used to assess population-based metrics such as cost or utilization, computed by dividing the total monthly cost/utilization/other measure by the total number of member months for the population over a specific time period.

⁴ The percentage of total average costs for covered benefits that a plan will cover. For example, if a plan has an actuarial value of 80%, on average, the enrollee/member would be responsible for 20% of the costs of all covered benefits.

Large Group Prescription Drug Costs⁵

- Prescription drug expenses, net of manufacturer rebates, accounted for \$76.14, or 14.0%, of health plan premiums on a PMPM basis in 2022.
- Prescription drug costs for large group health plans increased by 7.4% in 2022, whereas medical expenses increased by 3.7%. Overall, health plan premiums increased by 3.1% from 2021 to 2022.
- The percentage of premiums spent by large group health plans on prescription drugs ranged from 9.4% to 27.3%.
- Manufacturer drug rebates totaled approximately \$899 million in 2022, up from \$800 million in 2021. These rebates helped mitigate some of the overall impact of rising prescription drug prices by reducing total health plan premiums by 1.8% in 2022.
- All 23 health plans, including IHSS plans, utilized pharmacy benefit managers⁶ (PBMs): 23 health plans used PBMs for claims processing; 15 health plans used PBMs for utilization management, 14 health plans used PBMs for provider disputes resolution; and 5 health plans used PBMs for enrollee grievances.

⁵ Includes premium, medical expenses and prescription cost information for only large group products with prescription drug benefits.

⁶ A pharmacy benefit manager is an organization dedicated to administering prescription benefit management services to employers, health plans, third-party administrators, union groups, and other plan sponsors. A full-service PBM maintains eligibility, adjudicates prescription claims, provides clinical services and customer support, contracts and manages pharmacy networks, and provides management reports.

Chart 1 illustrates the average premium⁷ PMPM for regional⁸ and statewide⁹ health plans from 2016 to 2022. The average premium PMPM increased by 18% for regional health plans and 26% for statewide health plans from 2016 to 2022. On an annualized basis over this period, the average rate increase for the regional health plans was 2.9% and the average rate increase for the statewide health plans was 4.0%.

Chart 1

Seven-Year Trend Analysis: Average Large Group Premium Per Member Per Month

⁷ Premium is the monthly payment the enrollee and/or enrollee’s employer pays for health coverage. Factors that impact large group premium rates include age, geography/location, family size, occupation/industry and health status (historical experience and utilization of medical services).

⁸ Regional plans are health plans that primarily operate and offer health care products to enrollees in specific regions.

⁹ Statewide plans, as their name implies, operate and offer health care products to enrollees in multiple regions throughout the state.

4 Large Group Aggregate Rates and Prescription Drug Costs Report (2022)

Chart 2 shows the weighted average rate increase trend¹⁰ from 2016 to 2022. The rate increases on average have fluctuated from 2016 to 2022 but have remained below 6% each year.

Chart 2

Weighted Average Rate Increase Trend

¹⁰ Not adjusted for changes in such things as benefits, cost sharing, provider network, geographic rating area, and average age.

Health plans are required to include information in their notice of premium rate change indicating whether the rate change is greater than the average increase for CalPERS and Covered California. Table 1 shows the side-by-side comparison of the rate increases for CalPERS, Covered California individual market products, and the large group and statewide health plans since 2016. While the Covered California increases have fluctuated, the average unadjusted rate increases for large group health plans, with the exception being the 2018 measurement year, have remained in the vicinity of 4% for each measurement year.

Table 1

Rate Increases for Covered California, CalPERS and Large Group Health Plans

Year	Covered California ¹¹	CalPERS	Large Group Health Plans
2016	4.0%	7.7%	3.9%
2017	13.2%	3.9%	3.9%
2018	21.1%	2.5%	5.4%
2019	8.7%	1.1%	3.6%
2020	0.8%	5.1%	4.3%
2021	0.5%	5.3%	4.2%
2022	1.8%	5.5%	4.1%
2023	5.6%	7.0%	unavailable

¹¹ Covered California experienced double digits rate increases for the individual market products in 2017 and 2018 due to changes at the federal level. In 2017, the Affordable Care Act’s Reinsurance and Risk Corridor programs ended. In 2018, rate changes were considerably larger than usual due to the uncertainty regarding cost sharing reduction funding from the federal government. Additionally, in 2019, the federal individual mandate ended which resulted in slightly higher premium increases.

II. Introduction/Background

In 2015, California enacted SB 546 for the purpose of increasing transparency of rates in the large group market. SB 546 requires health plans that offer commercial large group products to annually submit aggregate rate information and the weighted average rate increase for all large group benefit designs during the 12-month period ending January 1 of the following calendar year to the DMHC. The DMHC is required to conduct a public meeting regarding large group rate changes. The DMHC held its first public meeting on large group aggregate rates in February 2017. Starting in 2022, the public meetings are held in even-numbered years only.

To further increase transparency of large group rates, Assembly Bill (AB) 731¹² (Kalra, 2019) established a rate review process for the large group market. Effective July 1, 2020, health plans with large group products must file specified information at least annually and 120 days before any change in methodology, factors or assumptions that would affect the rate paid by a large group employer or contract holder.

Additionally, health plans are required to comply with disclosure requirements relating to large group renewal notices. Specifically, no change in premium rates or changes in coverage stated in a group health plan contract can become effective unless the health plan has delivered a notice in writing indicating the change or changes at least 120 days prior to the contract renewal effective date including a statement comparing the proposed rate change to the average rate increases negotiated by CalPERS and by Covered California.

In addition, California Health and Safety Code (HSC) section 1367.243 (SB 17, 2017) requires health plans that file annual large group rate information with the DMHC to file specified information regarding health plan spending and year-over-year cost increases for covered prescription drugs. Large group health plans are also required to provide the names of the PBMs they utilize and their functions.

Under a separate statutory requirement, health plans that offer commercial products and file rate information with the DMHC are required to annually report specific information related to the costs of covered prescription drugs, including:

- The 25 prescription drugs most frequently prescribed to health plan enrollees;
- The 25 most costly prescription drugs by total annual health plan spending;
- The 25 prescription drugs with the highest year-over-year increase in total annual health plan spending; and
- The overall impact of drug costs on healthcare premiums.

This information is reported in the Prescription Drug Cost Transparency Report which can be found on the [DMHC website](#).

¹² The filings submitted by health plans pursuant to AB 731 are available on the DMHC [website](#) and are not discussed in this report.

III. Large Group Aggregate Rate Summary

The DMHC received the aggregate rate filings from 23 health plans for measurement year 2022, including eight statewide health plans, 10 regional health plans and five IHSS plans. The analysis in this report excludes the rate information for the IHSS plans because the rate development process for IHSS plans differs from traditional large group health plans, which utilize community rated, experience rated or blended rate development methodologies. For IHSS products, the county and the IHSS plans determine the rates which are based on the anticipated costs for providing services to the IHSS enrollees. The five IHSS plans had roughly 69,800 enrollees (with only about 18,000 enrollees affected by a rate change) as of December 31, 2022; this represents less than 1% of the large group enrollment. The remaining 18 health plans served almost 7.9 million enrollees. Kaiser Foundation Health Plan, Inc.'s (Kaiser Permanente) enrollment represented 66% of the large group market or 5.2 million of the 7.9 million enrollees. Since Kaiser Permanente's data had such a significant impact on the overall state averages, the data for Kaiser Permanente is often shown on a stand-alone basis throughout this report.

The observations from the 2022 health plan data related to the large group aggregate rates include:

- In 2022, almost 7.9 million enrollees were covered by the large group health plans. The overall average premium per member per month (PMPM) was nearly \$552. Overall, the unadjusted weighted average rate increase for the large group health plans was 4.1% in 2022. (Table 2)
- In 2022, approximately 7.7 million enrollees in roughly 14,500 renewing groups were affected by the rate changes (Tables 3 and 4).
- Statewide health plans represent almost 97% of large group membership. The eight statewide health plans had approximately 7.6 million covered enrollees in 13,836 renewing groups in the large group market. Overall, the average unadjusted rate increases in 2022 were generally in the mid to high-single digits. Kaiser Permanente, which had the second lowest overall premium of all statewide health plans, made up a significant percentage of the statewide market and therefore heavily impacted the overall average. (Table 3)
- Regional health plans have very small market share compared to the statewide health plans. The 10 regional health plans had about 253,600 covered enrollees in 668 renewing groups, accounting for about 3% of large group market enrollment. Western Health Advantage, Sharp Health Plan, and Sutter Health Plan (Sutter Health Plus) represent the largest of these health plans in terms of membership. Overall, the average rate increase for the regional health plans was 2.4% in 2022. (Table 4)
- In 2022, Preferred Provider Organization (PPO) and Point of Service (POS) plans had the highest premium, with an average premium of nearly \$635 PMPM. Overall, Health Maintenance Organization (HMO) plans experienced the second lowest average rate increase of 3.9%, and had the second lowest average premium, or \$545 PMPM. Point of Service (POS) plans had the lowest overall average rate increase with an average of 3.5%. (Table 5)

- Most members, approximately 6.4 million or slightly over 81% of large group enrollees, were in HMO plans with actuarial values of at least 80% and therefore, the richest benefits overall. In contrast, less than 7% of large group enrollees were in High Deductible Health Plans (HDHP), which tend to give members a lower premium option with higher out of pocket costs. (Table 6)

Table 2 shows the unadjusted and adjusted average rate increases for all large group health plans (including Kaiser Permanente), Kaiser Permanente and all large group health plans excluding Kaiser Permanente.

Table 2

Average Rate Increase in the Large Group Market in 2022

	Unadjusted Average Rate Increase	Adjusted¹³ Average Rate Increase	Number of Enrollees	Average Premium Per Member Per Month (PMPM)
All Health Plans	4.1%	4.4%	7,877,936	\$551.94
Kaiser Permanente	3.6%	3.6%	5,190,040	\$541.64
All Health Plans Excluding Kaiser Permanente	5.0%	5.9%	2,687,896	\$571.82

¹³ “Adjusted average rate increase” means the unadjusted average rate increases are adjusted or normalized to reflect aggregate changes in benefit designs, cost sharing, provider network, geographic rating region, and average age. In general, changes in benefit designs, cost sharing, provider network, geographic rating region, and average age may result in higher adjusted average rates than unadjusted rates.

Tables 3 and 4 show the average rate increases for the statewide and regional health plans in the large group market.

Table 3

Average Rate Increase in the Large Group Market in 2022 – Statewide Health Plans

Health Plan Name	Number of Renewing Groups	Number of Enrollees	Percentage of Large Group Total	Unadjusted Average Rate Increase	Adjusted Average Rate Increase	Average Premium PMPM
Kaiser Permanente	8,807	5,190,040	65.9%	3.6%	3.6%	\$541.64
Anthem Blue Cross	1,544	1,138,586	14.5%	4.3%	5.9%	\$543.08
Blue Shield of California	941	515,781	6.5%	5.3%	4.7%	\$580.66
Health Net of California	341	263,624	3.3%	5.8%	5.8%	\$669.45
UnitedHealthcare Benefits Plan of California	807	185,872	2.4%	8.5%	12.6%	\$585.89
UnitedHealthcare of California	565	166,744	2.1%	5.1%	5.5%	\$588.37
Aetna Health of California	605	112,575	1.4%	7.1%	7.8%	\$535.43
Cigna Healthcare of California	226	51,123	0.7%	5.0%	4.2%	\$592.26
Total	13,836	7,624,345	96.8%	4.1%	4.5%	\$551.27

Table 4**Average Rate Increase in the Large Group Market in 2022 – Regional Health Plans**

Health Plan Name	Number of Renewing Groups	Number of Enrollees	Percentage of Large Group Total	Unadjusted Average Rate Increase	Adjusted Average Rate Increase	Average Premium PMPM
Western Health Advantage	181	62,634	0.8%	1.3%	4.0%	\$569.36
Sutter Health Plus	334	64,632	0.8%	3.8%	4.1%	\$549.95
Sharp Health Plan	112	57,242	0.7%	0.9%	0.8%	\$527.39
Valley Health Plan	2	24,856	0.3%	3.8%	3.8%	\$765.71
Scripps Health Plan Services	1	15,648	0.2%	0.5%	0.5%	\$481.53
Ventura County Health	1	11,441	0.2%	1.8%	1.8%	\$599.99
Community Care Health Plan	11	9,861	0.1%	4.2%	4.2%	\$463.71
Contra Costa Health Plan	3	5,024	0.1%	6.9%	6.9%	\$862.14
Chinese Community Health Plan	22	2,003	0.0%	5.0%	5.0%	\$615.24
MemorialCare Select Health Plan	1	250	0.0%	0.0%	0.0%	\$543.91
Total	668	253,591	3.2%	2.4%	3.1%	\$572.18

Average Rate Increase and Actuarial Value by Product Type

Health plans also reported the average rate increase and actuarial value information by product type. Table 5 shows the average rate increases and the average premium PMPM across these product types.

Table 5

Average Rate Increase and Premium by Product Type

Product Type	Average Rate Increase	Minimum	Maximum	Average Premium PMPM
Preferred Provider Organization (PPO)	6.1%	0.0%	8.8%	\$632.78
Point of Service (POS)	3.5%	-0.8%	4.5%	\$634.30
Exclusive Provider Organization (EPO)	6.7%	0.0%	11.8%	\$584.67
Health Maintenance Organization (HMO)	3.9%	0.0%	7.1%	\$545.15
High Deductible Health Plan (HDHP)	4.7%	0.7%	7.6%	\$514.50

Table 6 shows large group market enrollment by product type and actuarial value.

Table 6

Number of Covered Lives by Actuarial Value by Product in the Large Group Market

Product Type	Actuarial Value					
	0.9 – 1.00	0.8 – 0.89	0.7 – 0.79	0.6 – 0.69	< 0.60	All
Health Maintenance Organization (HMO)	5,595,712	818,340	146,352	34,884	359	6,595,647
Preferred Provider Organization (PPO)	128,851	459,029	69,034	17,413	944	675,271
High Deductible Health Plan (HDHP)	2,944	212,288	196,438	94,777	5,439	511,886
Point of Service (POS)	57,451	3,839	185	83	-	61,558
Exclusive Provider Organization (EPO)	14,126	21,078	2,545	1,671	123	39,543
Total	5,799,084	1,514,574	414,554	148,828	6,865	7,883,905

Table 7 groups HMO membership into actuarial value ranges for the following categories: statewide health plans (excluding Kaiser Permanente), Kaiser Permanente, and regional health plans. As the table demonstrates, a sizable majority of members have benefits in the 0.9 -1.00 range, the richest benefit bracket. When compared to statewide plans, benefits in the regional health plans tended to be a little less generous overall.

Table 7

Actuarial Value for HMO Members

Actuarial Value	Statewide Health Plans (Excluding Kaiser Permanente)	Kaiser Permanente	Regional Health Plans
0.9 – 1.00	81.3%	86.0%	74.1%
0.8 – 0.89	14.1%	11.8%	21.5%
0.7 – 0.79	3.7%	1.8%	3.1%
0.6 – 0.69	0.9%	0.4%	1.3%
<0.60	0.0%	0.0%	0.0%

Large Group Rating Methodology

Large group health plans use one of the following three rating methodologies to set premium rates: community rated, experience rated or blended. Community rating uses a standard base rate for a pool of large employer groups and additional factors specific to that employer group, such as geographic region or industry, to determine rates. Experience rating uses the actual claims experience of an employer group to determine rates for a given employer group. Finally, a blended approach calculates rates using a blend of rates determined via community rating and experience rating.

Table 8 shows the percentage of renewing groups, number of enrollees, unadjusted average rate increases, and average premium PMPM by rating methodology. Although the percentage of experience rated groups is lower compared to blended and community rated groups, the number of enrollees in experience rated groups is significantly larger.

Table 8

Percentage of Renewing Groups and Enrollment by Rating Methodology

Category	Percentage of Renewing Groups	Number of Enrollees	Unadjusted Average Rate Increase	Average Premium PMPM
Community Rated	61.3%	1,063,770	4.8%	\$553.82
Blended	27.6%	1,189,285	5.3%	\$543.60
Experience Rated	11.1%	5,624,882	3.7%	\$553.36

Chart 3 shows the percentage of renewing groups by rating methodology for statewide health plans (excluding Kaiser Permanente), Kaiser Permanente, and regional health plans. Because groups contracting with regional health plans tend to be smaller in size, it is less common for them to be experience rated, as their data may be less credible for projecting expected medical trend. Only 3.1% of groups contracting with regional health plans are experience rated. In comparison, groups contracting with Kaiser Permanente tend to be much larger, and therefore, their underlying rate data is more credible for projecting expected medical trend. Accordingly, Kaiser Permanente has a much higher percentage of experience rated groups than those of smaller health plans.

Chart 3

Percentage of Renewing Groups by Rating Methodology

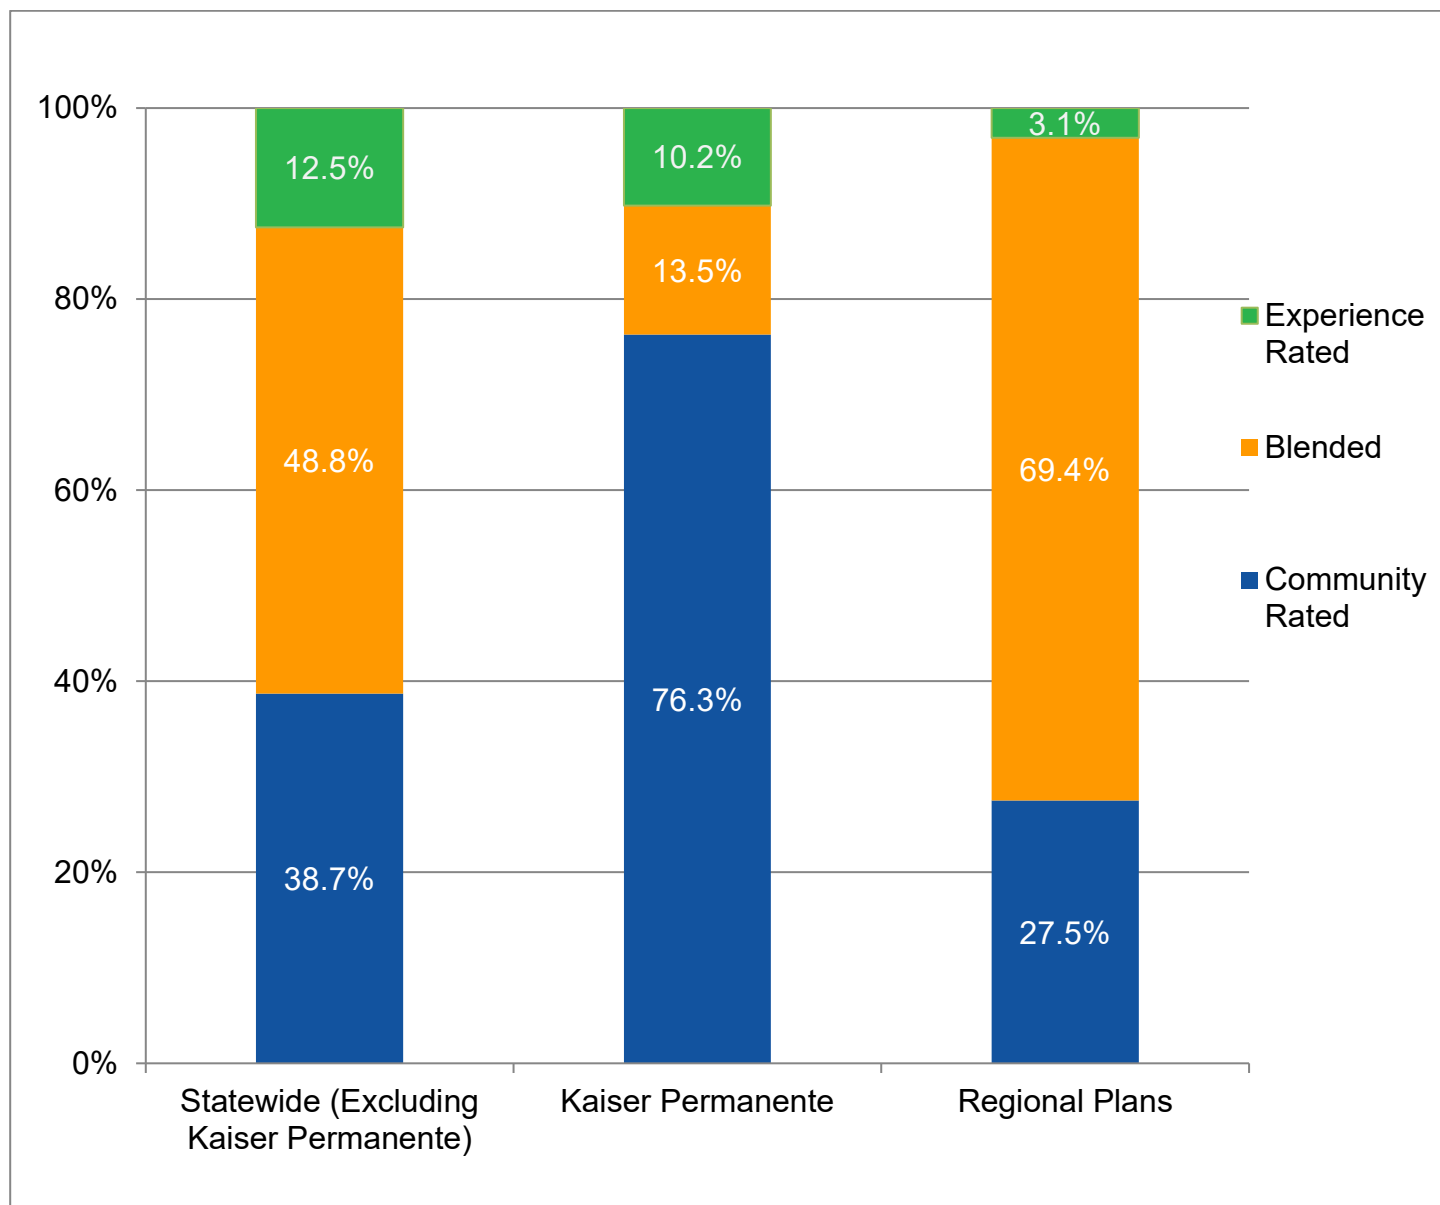

Chart 4 shows average unadjusted rate increases for statewide health plans (excluding Kaiser Permanente), Kaiser Permanente, and regional health plans. Ranked by methodology, blended groups had the highest increase, followed by community rated, then experience rated. Community rated groups have less credible data on which to base their rates. Experience rated groups, on the other hand, are typically larger and have more credible data to be used for rate development. In 2022, for each category of health plans shown below, the blended method experienced the highest rate increase.

Chart 4

Average Rate Increases by Rating Methodology

Chart 5 shows the percentage of renewing enrollees by rating methodology for statewide health plans (excluding Kaiser Permanente), Kaiser Permanente, and regional health plans. Because groups contracting with regional health plans tend to be considerably smaller in size, it is less common for them to be experience rated, as their underlying data is less credible for projecting expected medical trend. In 2022, slightly over 41% of members in regional health plans were experience rated. Groups that contracted with Kaiser Permanente tended to be much larger, and therefore provided more credible data for experience rating. As such, Kaiser Permanente had a much higher percentage of experience rated enrollees, accounting for almost 78%.

Chart 5

Percentage of Renewing Enrollees by Rating Methodology

IV. Impact of Prescription Drug Costs on Large Group Rates

The DMHC also analyzed the impact of the cost of prescription drugs on large group health care premiums, on an aggregate level and on a PMPM basis. For this section of the report, health plans reported only on the large group products that included prescription drug benefits.

Chart 6 shows the breakdown of total health plan premiums on a PMPM basis. For measurement year 2022, the total health plan premium on a PMPM basis was \$544.53. Medical expenses accounted for \$424.04, or 77.9% of the health plan premium. Prescription drug expenses, net of manufacturer rebates, accounted for \$76.14, or 14.0% of total health plan premium on a PMPM basis. Administrative expenses¹⁴ including commissions accounted for \$30.26, or 5.6% and taxes and fees made up \$9.55, or 1.8% of total health plan premiums on a PMPM basis. Profit accounted for the remaining \$4.55, or 0.8% of the total health plan premium on a PMPM basis.

Chart 6

Breakdown of Large Group Health Plan Premium PMPM

¹⁴ Administrative expenses are business expenses associated with general administration, agent/broker fees and commissions, direct sales salaries, workforce salaries and benefits, loss adjustment expenses, cost containment expenses, and community benefit expenditures.

Table 9 shows the components of large group health care premiums on a PMPM basis in 2022 in comparison to 2021. Medical expenses increased by 3.7% since 2021, while prescription drug expenses increased by 8.1%. Manufacturer drug rebates increased by 13.9% in 2022 and totaled approximately \$899 million in 2022 compared to \$800 million in 2021. These rebates helped mitigate some of the overall impact of rising prescription drug prices by reducing total health plan premiums by 1.8% in 2022. Administrative expenses, including commissions increased by 1.8%, taxes and fees decreased by 18.2%, and health plan profit decreased by 32.2% in 2022 as utilization and costs increased after the COVID-19 pandemic.

Table 9

Components of Large Group Health Plan Premium on a PMPM Basis

Category of Premium Payment	2022	Percentage of Premium	2021	Percentage of Premium	Year-over-Year Percentage Change
Medical Expenses	\$424.04	77.8%	\$409.06	77.5%	3.7%
Prescription Drug Expenses	\$85.77	15.8%	\$79.33	15.0%	8.1%
Manufacturer Drug Rebates	(\$9.64)	(1.8%)	(\$8.46)	(1.6%)	13.9%
Administrative Expenses including Commissions	\$30.26	5.6%	\$29.71	5.6%	1.8%
Taxes and Fees	\$9.55	1.8%	\$11.67	2.2%	(18.2%)
Profit	\$4.55	0.8%	\$6.72	1.3%	(32.2%)
Total Health Plan Premium	\$544.53	100.0%	\$528.03	100.0%	3.1%
Member Months (in millions)	93.29		94.47		(1.2%)

Health plans also reported their average health care premium, medical expenses, and prescription drug costs, including costs associated with administering prescription drugs in a doctor's office. Table 10 shows the average premium, and the percentage of premium spent on prescription drugs and medical expenses for each of the statewide health plans, averages for all statewide health plans (excluding Kaiser Permanente), Kaiser Permanente and averages for all regional health plans.

Table 10

Large Group Prescription Drug and Medical Expenses as a Percent of Premium 2022

Health Plan Name	Average Premium	Percentage of Premium Spent on Prescription Drugs	Percentage of Premium Spent on Medical Expenses ¹⁵
Aetna Health of California	\$520	11.7%	70.9%
Anthem Blue Cross	\$541	23.5%	64.0%
Blue Shield of California	\$586	14.0%	76.9%
Cigna Healthcare of California	\$586	14.4%	75.7%
Health Net of California	\$582	11.6%	81.7%
UnitedHealthcare of California	\$586	9.4%	80.2%
UnitedHealthcare Benefits Plan of California	\$543	11.1%	76.4%
Statewide Plans (Excluding Kaiser Permanente)	\$559	17.4%	71.4%
Kaiser Permanente	\$537	12.4%	80.9%
Regional Health Plans	\$573	15.0%	73.5%

¹⁵ Does not include prescription drug expenses.

Five health plans reported information related to the costs associated with administering drugs in a doctor's office.¹⁶ Table 11 shows the range of costs for these services on a PMPM basis. The maximum cost reported by health plans was \$42.38 PMPM, and the minimum reported was \$1.12 PMPM. The median cost reported for all health plans was \$19.40 PMPM.

Table 11

Costs for Drugs Administered in a Doctor's Office on a PMPM Basis

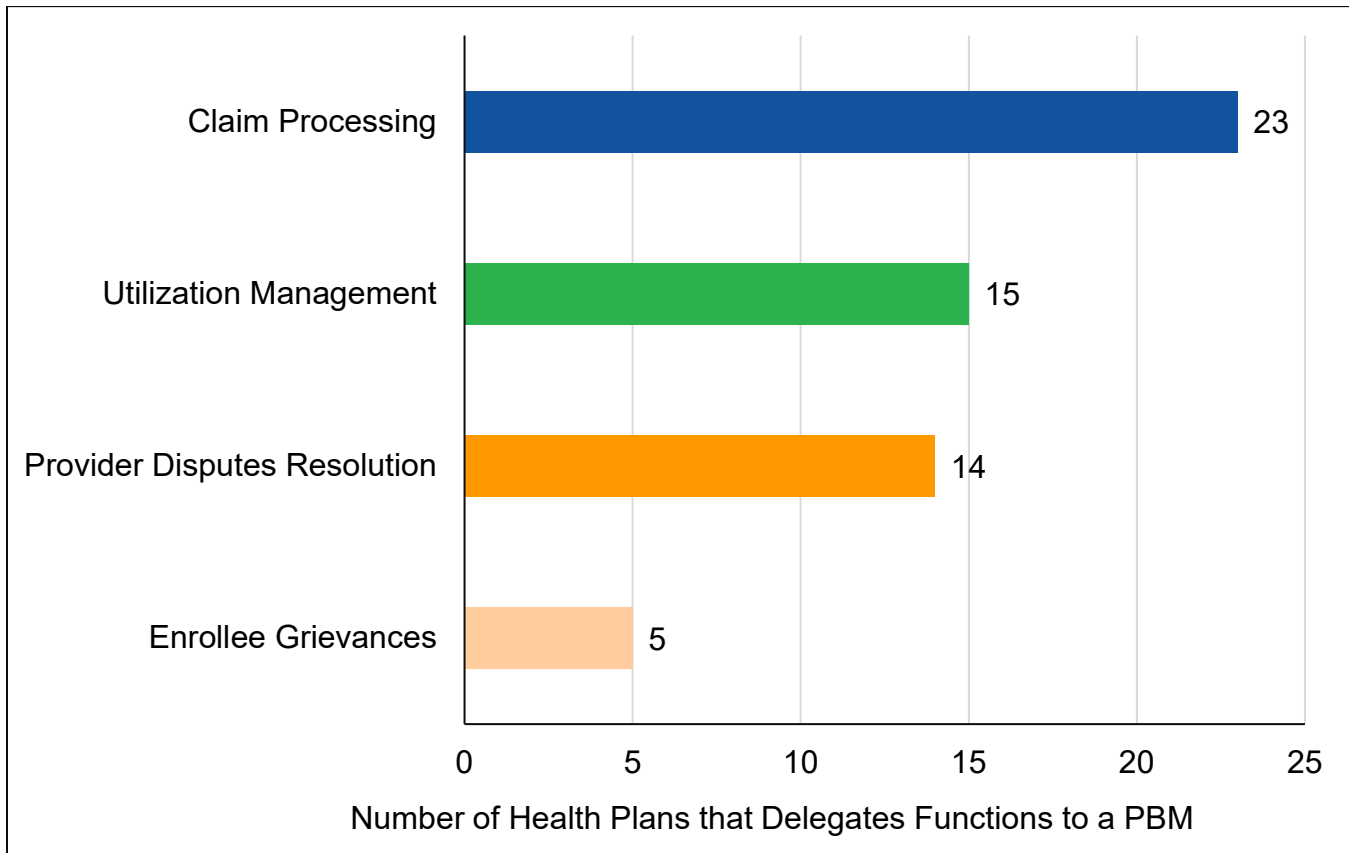

Category	Number of Health Plans	Minimum (Reported)	Maximum (Reported)	Median (Reported)
All Health Plans	5	\$1.12	\$42.38	\$19.40
Statewide Health Plans (Excluding Kaiser Permanente)	1	\$42.38	\$42.38	\$42.38
Kaiser Permanente	1	\$19.40	\$19.40	\$19.40
Regional Health Plans	3	\$1.12	\$24.19	\$2.05

¹⁶ Health plans were required to report this information if it was available.

Chart 7 shows PBM functions for large group health plans. All 23 large group health plans, including IHSS plans, utilized PBMs. As shown below, all large group health plans use PBMs for claims processing, 15 health plans used PBMs for utilization management, 14 health plans used PBMs for provider disputes resolution, and five health plans used PBMs for enrollee grievances. A detailed listing of the PBMs utilized by health plans is included in Appendix A.

Chart 7

Pharmacy Benefit Manager (PBM) Functions for Large Group Health Plans

V. Conclusion

Generally, from 2016 to 2022, the annual average rate increases for the large group market have remained relatively consistent, averaging around an increase of 4% each year, with 2018 being an outlier. A comparison of these average rate increases to those of Covered California and CalPERS showed that the annual average rate increases for the large group market have ranged from 3.5% to 5.5%, compared to Covered California which has ranged from 0.5% to 21.1%, and CalPERS, which has ranged from 1.1% to 7.7%.

Due to the COVID-19 pandemic, overall utilization declined in 2020 and 2021. However, in 2022, utilization and spending for medical and prescription drug expenses have both rebounded to pre-pandemic levels, likely due to increased rates of COVID-19 testing, vaccination and treatment, and the return of patients who had deferred care earlier in the pandemic. Future reports will provide more insight into the long term impact of COVID-19 on premiums in the large group market.

The report provides transparency into the large group market by providing insight into a health plan's average rate increases for the reporting year along with historical and anticipated claims trends, actuarial values, and rating methodologies utilized. The DMHC will continue to collect and report this data, which will provide the public access to aggregate rate and data information pertaining to the large group market. In 2024, the DMHC will hold the next public meeting regarding large group rate changes and prescription drug costs.

Appendix A: Pharmacy Benefit Managers Utilized by Large Group Health Plans

Health Plan Name	Functions Delegated to PBM				
	PBM Name	Utilization Management	Claims Processing	Provider Dispute Resolutions	Enrollee Grievances
Aetna Health of California	CVS	Yes	Yes	Yes	No
Alameda Alliance For Health	PerformRX	Yes	Yes	Yes	No
Anthem Blue Cross	IngenioRx	Yes	Yes	Yes	No
Blue Shield of California	CVS Health	No	Yes	No	No
Chinese Community Health Plan	MEDIMPACT	Yes	Yes	Yes	No
Cigna Healthcare of California	Cigna Pharmacy Management	Yes	No	No	Yes
Cigna Healthcare of California	ESI	No	Yes	Yes	No
Community Care Health Plan	MEDIMPACT	Yes	Yes	Yes	No
County of Ventura	Express Scripts	No	Yes	No	No
Contra Costa Health Plan	PerformRX	No	Yes	No	No
Health Net of California	Caremark	Yes	Yes	No	No
Kaiser Permanente	MEDIMPACT	Yes	Yes	Yes	No
L.A. Care Health Plan	Navitus Health Solutions	No	Yes	Yes	No
