Option 1: Adapt DMHC's Existing Health Equity and Quality Measures with Gender-Inclusive and TGI-Specific Criteria

- Review DMHC's existing health equity and quality measures for gender biased or exclusive language
- Identify specific needs of TGI community
- Propose amendments to the health equity and quality measures, including de-gendered language and criteria inclusive of TGI individuals

Option 2: Define TGI-Specific Quality Domains

- Conduct a thorough literature review and consult with experts to identify critical domains for TGI healthcare
- Identify quality domains unique to the healthcare experience and needs of TGI individuals
- Develop a framework that outlines and defines the TGI-specific quality domains

Option 3: Recommend Further Research and Collaboration

- Engagement with the TGI community, providers, researchers, and other stakeholders
- Surveys, interviews, and focus groups
- Collaboration with mental health providers
- Quantitative and qualitative data analysis
- Expert panel to review findings and recommend quality standards

Finalization of Training Curriculum Recommendations
